

Understanding The World Home Learning

- As part of your daily exercise, go outside for a walk and notice signs of Spring, can you find buds on trees, flowers growing, baby animals? Take photos or draw what you find.
- Go on a technology hunt in your house. Can you find all the things that need to be plugged in or turned on to work. Can you write or draw the things you find?
- Choose an animal you love. Use the internet and books to find out facts about the animal. Find out whether it comes from an egg, how it grows, what it eats, where it lives, how big it is, what it needs to be healthy etc. Choose how you record what you find out-poster, booklet, video, model.
- Seed growing- if you have the space and resources then try growing a seed together, you could take photos of the plant growing and explore some ideas on what the plant needs to grow with your child. Don't worry if you don't have the space, or things you need (and please do not go out to get them) Miss Burns will be posting some videos of her planting projects that you can access on the YouTube channel and explore life cycles of plants together.
