

Design and Technology – Make a Toy or Game

Can you make a game or a toy using recycled materials?

In our year of kindness it is good to re-use things that we would normally throw away. Below are some ideas for you to try or you can come up with your own design. (We would ask you **not** to create a vehicle as this is a topic that is covered when you go into Year 2).

The teachers would love to see any photos of your toy or game.

There is also a planning sheet you could fill in, if you want to.

This helps you to plan your design, select the materials you will need and how you will join the materials together.

The last part of the planning sheet is for you to reflect on your work and to say what you like about it and what you could have made even better.

Good Luck!

Mrs Beattie, Mrs King and Mrs Shyvers.
