

## Science: Seasonal Change

<b>Seasonal change</b>	<p>We are looking at how the weather changes as we go through the seasons, the fact that days are now becoming shorter and what changes we notice outside.</p> <p>Maybe your child could draw or write about the things they have noticed now Autumn is changing to Winter. The leaves have fallen from the trees, the days are colder etc.</p> <p>They could keep a weather diary.</p> <p>Record sunset and sunrise times to see what happens to the length of days as we head towards Winter. (You may need to look these up to help record as the sunrise is later and the sunset and is getting earlier)</p>
